PROJECTS

Unisys (Assessment-Based Module) <https://betaobafrontend.unisys.online/>

- Built a multi-tenant academic SaaS with AI-powered exams and courses using React.js and Django for Middle Eastern universities.
- Integrated Firebase notifications and deployed on Google Cloud Platform (GCP).

Taalif (Book Author Management System) <https://taalif.cloud/>

- Built a scalable SaaS platform for managing authors, books, and publishing workflows.
- Developed frontend and backend using React.js and Django with AI-assisted features.
- Used Git for version control, Firebase for notifications, and deployed on AWS.

ILC (Interactive Language Corporation) <https://ilc.502.org.in/>

- Developed a high-impact landing page with custom, graphics-rich UI using React.js and Django.
- Built an online learning platform enabling users to purchase courses across two categories.
- Deployed on Google Cloud Platform (GCP) for scalable and reliable delivery
